PROJECTS

MaraGoal <https://maragoal.herokuapp.com/>

- Full stack marathon training web application using MongoDB, Express, React, and Node.js
- Developed in about 2 weeks
- Features include user authentication, calendar with personalized training schedule, running diary, and group chat
- Personally responsible for real-time group chat feature with socket.io, as well as troubleshooting throughout the application

Twin Peaks Clicky Game <https://react-clicky-twin-peaks.herokuapp.com/>

- Front end web application built with React
- Developed in 1 day
- User clicks on array of Twin Peaks characters that shuffle after each click. If a character is clicked more than once, the score is reset

Mongo Scraper <https://mongoscraper5.herokuapp.com/>

- Full stack Node.js application using Express, MongoDB/Mongoose, Cheerio, and Bootstrap
- Developed in about 3 days
- Scrapes and displays article title, summary, and link from <https://www.theonion.com/c/news-in-brief/>
- Option to save articles to a “Saved” page, delete from “Saved,” add a note (notes functionality unfinished)

Friend Finder <https://friend-finder21.herokuapp.com/>

- Node application using Express and Bootstrap
- Developed in about 3 days
- User fills out a personality survey and is matched with a new friend based on survey results

EXPERIENCE

Social Auto Transport at StartupVA

7/2018-present

Node.js Developer

- Independently developing a REST API with Node.js, Sequelize, MySQL on AWS RDS, and Express on AWS EC2. TDD with Mocha/Chai.
- Built a prototype front-end React /Node.js application that utilizes a third party API to create “moves” (various series of A-B car rides) based on specifications.
- Set up AWS integration using webhooks, API Gateway, Lambda, VPC, Sequelize/MySQL, and SNS.

VCU Parkinson's and Movement Disorders Center

6/2017-7/2018

Administrative Assistant, Project Coordinator, and Web Producer

- Event, sponsorship, and outreach coordinator. Project coordinator for the Movin' & Shakin' 5K fundraiser. Responsible for coordinating sponsorships and donations, advertising education and awareness events, interfacing with the patient community.
- Independently transferred PMDC website from FTP server to T4 CMS. Maintained website content in T4.

PunchOut2Go, Inc.

12/2016-6/2017

Software Integrations Project Manager

- Manager of PunchOut2Go's largest eProcurement software implementation project to date.
- Provided technical support for PunchOut2Go clients, performed project status presentations for clients. Configured integrations involving procurement platforms including SAP/Ariba, Coupa, and Jaggaer.

Delivery Agent, Inc.

1/2016-12/2016

eCommerce Assistant and Web Operations

- Maintained webstore content on custom CMS, prepared and executed promotional marketing campaigns. Troubleshoot and resolved, or managed resolution of, technical issues on webstores.
- Tracked eCommerce metrics and ran reports for analysis, merchandised product based on sales metrics. Optimized links for SEO performance.
